

## State-funded Harm

### How State-Funded CPCs Compared to CPCs Without State Funding

With two of the nine states in this Study providing state funds to support CPCs, the Alliance was able to analyze disparities in services offered by state-funded CPCs in individual states. These findings should serve as a bellwether for states nationwide that are funding CPCs.

The Alliance Study found two significant disparities in services offered by state-funded CPCs:

### State-funded CPCs promoted “abortion pill reversal” more often than CPCs without state funding.

- 40.7% of state-funded CPCs in Pennsylvania promote APR compared to 30.2% of the CPCs in PA without state funding
- 31.0% of state-funded CPCs in Minnesota promote APR compared to 21.3% of the CPCs in MN without state funding

### Fewer state-funded CPCs claimed to provide and refer for prenatal care than other CPCs.

- In Pennsylvania, not a single state-funded CPC provides prenatal care, compared to 1.6% of CPCs without state funding
- In Minnesota, while two of the four CPCs that provide prenatal care are PAA grantees, fewer state-funded CPCs refer clients for prenatal care (41.4%) than CPCs without state funding (47.5%)

These disparities underscore the need for a comprehensive analysis of state-funded CPCs and assessment of the maternal and public health consequences of this government investment.
